DETAILED ACTION

Claims 11-20 are pending in this application.

Drawings

The drawing(s) filed under 37 CFR 1.184 or 1.152 are accepted by the examiner.

Action Summary

The rejection of claims 11-20 under 35 U.S.C. 103(a) as being unpatentable over Tawashi is hereby withdrawn.

Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 11-20, drawn to method of treating iron deficiency comprising a patch, classified in class 514, subclass 814.
- Claims 21-30, drawn to a transdermal patch, classified in class 424, subclass 449.

The inventions are independent or distinct, each from the other because:

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of

10/642,858 Art Unit: 1616

using that product. See MPEP § 806.05(h). In the instant case the product as claimed can be used in a materially different process such as a patch for delivering birth control or a patch for delivering analgesics to relieve pain.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Application/Control Number:

10/642,858 Art Unit: 1616

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Newly submitted claims 21-30 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: These claims were presented earlier in the prosecution of this application and were found to not be allowable. They are now being claimed again, however, nothing has changed since there earlier presentation.

821.03.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 21-30 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP §

Examiner's Amendment

An examiner's amendment to the record appears below. Should that changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Katherine Aldred on March 12. 2008.

Amend the claims as follows:

IN THE CLAIMS:

Cancel claims 21-30.

In claim 11, line 1, delete "an iron deficiency" and insert "iron deficiency in a patient in need thereof."

Application/Control Number:

10/642,858 Art Unit: 1616

Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The claims are allowable over the cited prior art because the prior art does not teach, disclose nor make obvious a method of treating iron deficiency comprising a drug reservoir layer containing a hematinic substance and securing the drug reservoir layer to a skin surface. The closest prior art of Tawashi teaches a transdermal patch containing ferrous sulfate and NO. However, Tawashi does not teach, suggest or make obvious using the patch to treat iron deficiency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 11-20 are allowed.

Telephone Inquiries

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Konata M. George, whose telephone number is 571-272-0613. The examiner can normally be reached from 8:00AM to 6:30PM Monday to Thursday.
